SECURITY OPERATIONS WARRANTY
FOR YOUR HOME AND OFFICE

MITIGATE CYBER FINANCIAL RISKS

Trusted Internet eliminates cyber risks by prioritizing defense-in-depth protection across all cybersecurity layers and then monitoring it 24x7. Our security operations solutions include 24x7 Managed Detection and Response (MDR), Managed Automated Security Awareness Training, Email Protection and Two Factor Authentication, which collaborate to reduce the likelihood of cyber incidents and minimize their impact, thereby decreasing cyber risks for organizations.

"What happens if..." is a question that we hear often. In such scenarios, Trusted Internet provides an exclusive complimentary warranty through a partnership with a third-party cyber insurance company. This added benefit is accessible to customers with a strong security alliance with Trusted Internet and a commitment to cyber security.

In the event of a cyber attack, the Trusted Internet Security Operations Warranty offers financial aid of up to $500,000 USD for recovery efforts, legal fees, regulatory expenses, and related business costs.

TOTAL BENEFIT AMOUNT	$500,000
Ransomware and BEC	$100,000
Compliance or regulatory failure	$100,000
Cyber legal liability	$250,000
Business Income Loss	$50,000

PURCHASE OF MDR REQUIRED

NO COST BENEFIT

Trusted Internet's Security Operations Warranty is provided to eligible customers at no extra charge. And, the financial support available is independent of the customer spend.

EVENTS COVERED

Trusted Internet Security Operations Warranty offers financial coverage for one event per year for various cybersecurity incident expenses, such as:

- **Ransomware**: Assistance for expenses linked to a ransomware incident
- **Business Email Compromise (BEC)**: aid for costs related to a business email compromise leading to fraudulent fund transfers
- **Compliance**: support for regulatory fines, penalties, or other costs arising from a cybersecurity incident
- **Cyber Legal Liability:** coverage for legal expenses due to a cyber attack, including privacy, security, data loss, or misuse issues
- **Business Income Loss**: assistance for financial losses resulting from a cybersecurity incident causing a decline in business income

SECURITY OPERATIONS WARRANTY
FOR YOUR HOME AND BUSINESS

WARRANTY BENEFITS

Customers investing in Trusted Internet's MDR, Security Awareness and Training, Advanced Email Protection, and Two Factor Authentication bundle can qualify for up to $500,000 USD. Eligible customers can access the Security Operations Warranty from the subscription start date, subject to accepting extra standard terms and conditions. For availability in your area, please verify with Trusted Internet. This offer is not currently accessible in South Africa.

FIXED RATE CYBER INSURANCE FOR WARRANTY HOLDERS

Warranty participation automatically qualifies participants to add on highly discounted fixed-rate cyber insurance. This program is available to qualifying participants with annual revenues up to $100M and requires NO further underwriting approval for most classes of business industry sectors*

Fixed Rate cyber insurance coverage options include $1M and $3M policy limits.

*Some classes of business industry sectors are restricted from participation. Contact Cysurance to discuss the list of exclusions. Program Pricing in USD.

ABOUT TRUSTED INTERNET

Trusted Internet is at the forefront of global security operations, utilizing threat data from various sources like endpoint, network, identity, and cloud; the Trusted Internet Security Operations Center processes and evaluates billions of security events weekly to address key security scenarios. Trusted Internet offers automated threat identification and response on a large scale, enabling organizations of all sizes to establish top-tier security operations effortlessly.

For additional details about Trusted Internet, please visit trustedinternet.io.

Trusted Internet offers the Security Operations Warranty to eligible customers at no cost. This is made possible due to the extensive protection offered by our range of security operations solutions, such as:

MANAGED DETECTION AND RESPONSE

Managed Detection and Response (MDR) operates EDR, NDR, and Configuration/Patch Monitoring 24/7 to reduce alert exhaustion and false alarms, enabling quicker responses. The detection and response features are customized to suit your organization's requirements.

MANAGED AUTOMATED SECURITY AWARENESS AND TRAINING

Trusted Internet's Managed Knowbe4 and PhishER to serve up is the world's largest integrated platform for security awareness training, simulated phishing attacks, and employee self reporting of potential events.

ADVANCED EMAIL PROTECTION

Protection from advanced phishing, malicious links and files, plus threat emulation of files and links for zero-day protection.

TWO FACTOR AUTHENTICATION

Trusted Internet Managed Cisco Duo Dashboard and two factor authentication.
